**Abstract:**

*Efficiency stands for the quality of economic activities to produce positive effects. The efficiency of economic activities can be represented as the ratio of the achieved useful effect (the result) and the necessary effort to achieve it. When it comes to agriculture, the economic efficiency of patrimony exploitation represents the ratio of the effect materialized in a series of economic-financial indicators synthesizing the entire activity and the effort materialized in the patrimony of that particular unit.*

**Key words:** *economic activity, agriculture, indicators.*
