Abstract:

The analysis of economic efficiency provides answers to questions regarding the best way of using resources and the appropriate amount to be consumed. The analysis is done in terms of capitalization and saving degree of those resources. The direction of a productive activity's efficiency and the use of resources varies according to the different economic organizational levels, the interests pursued, the location where the economic activity takes place.

Key Words: *analysis, economic efficiency, resources*

JEL classification: R11 - Regional Economic Activity: Growth, Development, and Changes
