Abstract:

This work paper aims to point out the importance of evaluation’s methodology for trainers proposed by the program PREANTEAM for the implementation of the strategy adopted by the educational system of European Union regarding the development of the competitiveness. The program PREANTEAM was created in 1997 and represents the work’s result of European specialists, including Romania. In the same time, was pointed out the trainers’ role regarding the professional knowledge’s development, the identification and development of practical aptitudes.

Key Words: *simulated enterprise, educational system, trainers’ formation*
