UNIVERSITATEA BOURGOGNE – DIJON (FRANȚA)

**Abstract:**

*Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.*

*The concept of sustainable development is campaigning for inclusion in human activities present a liability in the longer term. It integrates environmental principles, commercial, and social.*

*Issues relating to the environment and sustainable development have economic implications for increasing the state (with the introduction of taxes, licensing contracts, and so on.), and for companies (such constraints, costs and opportunities through open markets with new applications).*

*Romania adopted some environmental taxes.*

**Key Words:** *sustainable development, environmental principles, tax*

**JEL classification:** H23
