***Abstract:***

*Romania is a member of the EU there is more than one year, which implies status analysis and the setting of priorities for the future. The index of the company has moved into a new parameter assessment for our country.*

*The analysis of a funding proposal in the aspect of sustainable development will be done with the index as a criterion of sustainable society. At the moment there are other criteria.*

*As each program has several lines of funding for specific areas of intervention, constraints impede access to the various structural instruments. The biggest is the lack of comprehensive information, both on accessibility on the uses that have already been achieved.*

***Key words:*** *sustainable development , structural instruments; Romania*

***JEL classification:*** *Q01 - Sustainable Development*
