

FONDUL SOCIAL EUROPEAN

THE EUROPEAN SOCIAL FUND

Abstract:

The European Social Fund is designated to improve the quality of the working places and the possibilities of occupation of the working force within the European Union. After the analysis realized it was observed that the success of financing the projects by FSE can be illustrated through examples of good practice from different Member States and European regions. From my point of view partnership promotes a tight collaboration between the European Commission and the national authorities, regional and local, the economic and social partners and other competent authorities, being considered relevant for the administration and absorption of the structural funds.

Key Words: *financings, projects, working force, partnership*
